PROFILE

Software Engineering undergraduate graduating in 2027, with project experience building React interfaces, Flask and Express APIs, and database-backed applications. Developed authentication, library workflows, and a browser extension integrating a Python analysis API. Seeking full-stack internship and junior opportunities.

TECHNICAL SKILLS

Frontend: JavaScript, React, HTML, CSS, Vite

Backend: Python, Node.js, Flask, Express.js, REST APIs, JWT authentication

Databases: SQL, MySQL, SQLite, MongoDB

Tools and foundations: Git, GitHub, Docker, Docker Compose, OOP, data structures, algorithms

SELECTED PROJECTS

Book Buddy Library Platform | Source

React, TypeScript, Node.js, Express, MySQL, JWT

- Built a React interface and REST backend for catalog search, borrowing, returns, notifications, and account management.
- Implemented JWT authentication and role-based access; used MySQL transactions to update loans, availability, and notifications together.

Librarium Library Management System | Source

Python, Flask, SQLAlchemy, SQLite, Docker

- Developed member and admin workflows with password hashing, route guards, catalog search, filtering, and loan history.
- Implemented borrowing and return flows with due dates; containerized the app and documented data and system diagrams.

HealthGuard Browser Extension

React, Vite, Chrome Manifest V3, Flask, Hugging Face Inference API

- Built a Chrome extension that captures selected webpage claims and sends them to a Flask analysis endpoint.
- Integrated optional zero-shot classification with a rule-based mock fallback; handled selection, loading, result, and error states. Educational prototype.

Daemon Marketing Workspace Demo | Source

React, Vite, browser storage

- Built an interactive frontend for project conversations, campaign planning, and creative previews with browser-persisted state. Agent responses and account flows are simulated.

EDUCATION

B.Sc. in Software Engineering | Assiut National University

Faculty of Computers and Artificial Intelligence | Expected 2027 | CGPA: 3.76

TRAINING

DEPI - Data Engineering | Dec 2025 - Jul 2026. Databases, SQL, ETL concepts, and data processing.

NTI - Python | Jun 2026 - Jul 2026. Python, OOP, problem solving, and data structures.
